EDUCATION

MIT ADT University – School of Engineering

Pune, India

B. Tech in Computer Science Engineering – AI & Analytics

2021 - 2025

- CGPA: 7.32/10
- Relevant Courses: Machine Learning, Data Mining, Deep Learning, Cloud Computing, Data Analytics, Neural Networks

TECHNICAL SKILLS

Languages: Java, Python, C++, JavaScript, SQL

Gen AI & AI Operations: Prompt Engineering, Large Language Models (LLMs), LLM Response Evaluation, AI Quality Assurance

AI/ML Tools: TensorFlow, PyTorch, Scikit-learn, Pandas, NLP

Web & Cloud: React.js, Material-UI, Spring Boot, RESTful APIs, Git, GitHub

Data Tools: Tableau, Power BI, Excel, Matplotlib, Seaborn

EXPERIENCE

Junior Associate, Zensar Technologies (Full Time)

Oct 25 – Nov 25

- Evaluated and refined LLM responses for an enterprise AI system using prompt engineering techniques.
- Applied prompt optimization strategies to improve AI response accuracy, consistency, and reliability.
- Performed AI quality assurance, response validation, and data quality metrics analysis, maintaining over 95% quality and 90% productivity.
- Collaborated with cross-functional teams to support AI workflow execution, model evaluation, and project delivery.

DAIS Intern, Vodafone Intelligent Solutions

Apr 25 – Sep 25

- Designed and deployed enterprise analytical data models in SAP Datasphere, improving schema reusability by 20% across BI projects.
- Optimized BigQuery tables and SQL query structures, delivering 15–20% faster analytical query performance.
- Performed STM and ETL workflow testing, ensuring 100% structural compliance with target data models.
- **Tools:** Excel, SQL, BigQuery, SAP Datasphere.

Full Stack Developer Intern, Xdigics Technologies Pvt. Ltd.

Jan 25 – Apr 25

- Worked on a cloud-native, multi-tenant HRMS SaaS product for mid-size manufacturing companies in India, improving API performance by 25% and enhancing HR workflow efficiency for 100+ end users across multiple client organizations.
- Built and improved core HR modules — Employee Management, Payroll, and Attendance — improving automation and data accuracy by reducing 20% manual tasks.
- Developed and optimized backend services using Java and Spring Boot to improve API performance and data flow.
- **Tools:** React.js, JavaScript, Material-UI, Java, Spring Boot, RESTful APIs, PostgreSQL.

PROJECTS

Customer Review Insights | Python, ML, NLP | [Link](#)

Jun 24 – Oct 24

- Developed an automated Aspect-Based Sentiment Analysis (ABSA) system achieving 92% sentiment classification accuracy, enabling smarter product improvement decisions.
- Improved customer feedback interpretation by 40%, using NLP-based aspect detection across key product and service attributes.
- Streamlined evaluation workflows, cutting manual feedback analysis time by 65% and improving reporting efficiency by 30% through interactive dashboards.

Keratoconus Detection Using CNN | Python, Deep Learning, AI | [Link](#)

Jan 24 – May 24

- Developed a CNN-based diagnostic model achieving 90% accuracy on test data for Keratoconus detection using corneal topography images.
- Enabled early-stage identification, significantly reducing diagnostic errors by 30% and supporting ophthalmologists in faster clinical decision-making.
- Built a simple, reliable screening workflow, improving usability and assessment efficiency by 40%.

CERTIFICATES & ACHIEVEMENTS

- Microsoft: Azure AI Fundamentals (AI-900)
- Udemy: Mastering DSA Using C & C++
- Board Infinity: Foundations of Java Programming
- IBM: Exploratory Data Analysis for ML
- AWS Academy Graduate: AWS Cloud Foundations
- IIT Bombay: R-Language Training (Score 95%)

LEADERSHIP & ACTIVITIES

- International Student Workshop – Data Science Using Python | MIT ADT University Feb 2024
- Participant – IDEA EXPO, Persona Fest | MIT ADT University Feb 2023
